Journal of Spelean History

Cumulative Index

covering

Issue #1 (Winter, 1968)

through

Issue #139 (January - June, 2011)

This is a cumulative index to the issues of the *Journal of Spelean History* (ISSN 0022-4693). The index is in three parts:

Part 1 is a list of the *JSH* **articles** along with a reference number for each one. The list is in order by *JSH* issue number. Following the reference number (which is used in the author and keyword indexes) is the article title, author(s), and bibliographic information. Text in square brackets is additional information and comments added during indexing. “[s]” following an author’s name means the material was submitted, but not written, by that person

Part 2 is a list of **authors** and reference numbers for their articles.

Part 3 is a **keyword list**, including subjects, locations, cave names, and people referenced in each article.

Although the formatting of this index was largely automated, the entry of the source data and the decisions about key words was an entirely manual process and there are undoubtedly errors in the material. If you find any errors please notify Bob Hoke so they can be corrected in future versions. He can be reached at bob@rhoke.net, 301-725-5877, or 6304 Kaybro St., Laurel MD 20707.

(The reference number for each article is 3 digits and one letter. The digits are the issue number and the letters are arbitrarily assigned to the articles in each issue. For example, if issue 36 contains three articles they would have reference numbers 036A, 036B, and 036C)

Check the ASHA Web site (www.cavehistory.org) for the latest version of this index either in PDF format or as a searchable html file.
